

1st INTERNATIONAL EARLY ENGINES CONFERENCE

11-13 May 2017, The Ironworks, Elsecar, South Yorkshire

"Ye Fier Ingen Near Bedminster Boydwell" by John Malchair in 1757. Courtesy of the Library of Corpus Christi College, Oxford

CALL FOR PAPERS

Researchers into the history and archaeology of early engines (defined as heat engines constructed before 1812) who would like to present their findings are invited to indicate their intention to the organising committee by the end of May 2016. This needs to be followed by submission of a 300-word synopsis for consideration by the end of August 2016.

The standard length of papers is 30 minutes, with shorter presentations and papers welcome.

Proposals for papers are encouraged on a wide range of topics such as technical developments, operations, financing and of course industrial archaeology, should be sent to: admin@earlyengines.org. It is intended to publish the proceedings as a dedicated volume of the International Journal for the History of Engineering and Technology

Further details of the Conference can be found at: www.earlyengines.org and these will be added to over time.

Conference facilities support and sponsors include:

- Barnsley Museums Service
- Newcomen Society
- Historical Metallurgy Society
- Northern Mines Research Society
- South Gloucestershire Mines Research Group
